---

## SUMMARY :

Full stack web developer with expertise in front-end and back-end development .

## TECHNICAL SKILLS :

- **Frontend** - Javascript , React Js , SASS
- **Backend** - Node.js , Express.js
- **DevOps** - Docker
- **Database** - MongoDB

## PROJECTS :

### Watch Together - Collaborative Video Streaming Application

**Tech Stack:** React.js, Socket.IO, Node js

- Built a synchronized video viewing platform with real-time chat and reaction features.
- Enhanced user collaboration with seamless video playback synchronization.

### Post-Comment Feature - Microservices Architecture

**Tech Stack:** Node.js, Express.js, MongoDB

- Designed a scalable microservices system with independent modules for authentication, comment management, and notifications.
- Leveraged MongoDB for efficient data storage and retrieval, ensuring seamless communication via RESTful APIs.

### Job Portal

**Tech Stack:** React.js, Node.js, MongoDB

- Developed an interactive portal for job seekers and employers, featuring search, filtering, job postings, and applications.
- Built robust user authentication and profile management with Node.js and MongoDB.

### Video Calling Platform with Peer-to-Peer Communication

**Tech Stack:** React.js, PeerJS

- Created a real-time video calling platform with features like screen sharing and peer-to-peer connections using PeerJS.

## Achievements :

[\[Link\]](#) Successfully completed an internship with CodSoft

[\[Link\]](#) Successfully completed an internship with Rekostech

## Education :

**Dev Bhoomi Uttarakhand University** , Dehradun | CSE | 2022 to 2025
